HOPE Scholarship | National President's List | Presidential Volunteer Award

Prior coursework completed at Georgia State University, J. Mack Robinson College of Business

Georgia Institute of Technology, Create-X Startup Launch

Atlanta, GA

Entrepreneurship Accelerator and Venture-Backed Founder (2 startups)

January 2026 – Present

Selected into GT's flagship startup program (top 10% acceptance rate) with weekly mentorship from venture coaches

EXPERIENCE

Invexs AI | AI Agent Fleet Control Platform

Atlanta, GA

Co-Founder & CFO | Built within Georgia Tech CREATE-X Startup Launch

Jan 2026 – Present

- Building enterprise platform providing **real-time monitoring, cost attribution, and governance** for autonomous AI agent fleets; targeting **VP-level platform engineering** buyers at banks, fintechs, and enterprise tech firms.
- Refined product-market fit through **continuous customer discovery** and competitive analysis across **TAM, unit economics, and positioning**; currently onboarding pilot customers for free-tier testing and structured feedback.
- Modeled **unit economics** and pricing scenarios for **usage-based SaaS** revenue across enterprise tiers; built **3-statement financial projections** and **investor-ready KPI dashboard** to support active fundraising conversations with institutional investors.
- Led technical product specification (**Go/GCP, PostgreSQL, Python SDK, React**) and shipped production landing page in **Next.js 14** with complete Tailwind design system.

Farely | Membership-Based Rideshare Platform

Atlanta, GA

Co-Founder & CFO | Built before Georgia Tech CREATE-X Startup Launch

May 2025 – Dec 2025

- Developed a **membership-based marketplace model** challenging per-ride commission structures of Uber/Lyft; earned acceptance into **CREATE-X** to receive seed capital and professional venture resources.
- Built an **8-month financial model (3-statement + unit economics)** with rider/driver segmentation and take-rate scenarios; sensitivity analysis modeled projected **CAC reduction** and improved **driver retention** relative to incumbent pricing structures.
- Designed a fare strategy ~5% below incumbents while protecting driver earnings; built **CAC/LTV payback framework** in an investor-ready dashboard modeling projected **YoY revenue growth** across funding scenarios.

Dallas Venture Capital

Irving, TX

Investment Summer Analyst

May 2025 – Aug 2025

- Supported **Series A due diligence** for Docyt, an AI-powered accounting automation platform; built **DCF valuation model**, analyzed financial viability, and assessed strategic synergies to inform **investment sizing and terms**.
- Sourced early-stage **SaaS and FinTech** deals through **market sizing and competitive analysis**; automated data-driven pipeline reports visualizing **deal-level KPIs** across 20+ active opportunities.

Quarstech

Atlanta, GA

Consulting Intern

Sep 2023 – May 2024

- Performed **P&L analysis** across operations and vendor-related cost centers, supporting oversight of **\$500K** in departmental budgets; identified inefficiencies in **vendor spend** and workflow processes, contributing to **\$37K in annual cost savings**.
- Identified process inefficiencies across project workflows through structured **cost-driver analysis**; developed recommendations that reduced **operational lag** and improved **resource utilization** across key departments.

PROJECTS & RESEARCH

GITHUB.COM/HARSHITHSAISURENDRA-LAB

Stockify Analytics | Quantitative Trading Strategy Using LLMs

June 2024 – Present

- Engineered a **long/short equity strategy** leveraging large language models to extract sentiment signals from **10-K filings and SEC disclosures**; constructed thematic factors including supply chain risk and executive tone to model impacts on equity returns and volatility. Conducted a **15-month backtest on QuantConnect**, benchmarking against the S&P 500, achieving ~8% **excess return** with a **Sharpe Ratio of 1.25** and controlled drawdowns.

NexusAI | SMB FinTech Operations Platform

Sep 2025 – Present

- Architected platform integrating Stripe and QuickBooks APIs for unified payroll, tax-filing, and financial record-keeping; built AI Copilot enabling natural language execution of complex financial and HR operations

EffiPay | Multi-Account Rewards Optimizer

Oct 2024 – Dec 2024

- Built FinTech application using Plaid API to aggregate multi-account transaction data; developed rules engine for transaction categorization and recommendation algorithm to optimize credit card rewards across spending categories
